

## RINSE-AID ADDITIVE FOR DISHWASHER RINSE CYCLES

- Facilitates the running-off of water, preventing the formation of marks.
- Guarantees sparkling and dry dishware.
- Made with surfactants of vegetable origin.

### SUGGESTIONS

For the best possible results, BRILLMATIC must be used following the correct indicated dosages. In industrial-type dishwashers, it is recommended to install the appropriate automatic dosage unit NPR1, which guarantees the correct dosing of the product and the best possible results.

### DESCRIPTION

According to the HACCP sanitising programme, after every wash carried out with a dishwasher, it is necessary to pay the utmost attention in order to not contaminate the clean dishes with dirty and non-disinfected cloths. For this reason it is necessary to use a specific product for the drying cycle for dishware, plates and glasses which renders manual finishing unnecessary. BRILLMATIC is a rinse-aid and drying additive which allows the perfect drying of the dishware by facilitating the running-off of water, avoiding the formation of marks, lime scale stains and white streaks. Ideal for the mechanical washing of dishware, it is essential in glass washing machines.

**RINSE-AID ADDITIVE FOR DISHWASHER RINSE CYCLES**
**PHYSICAL AND CHEMICAL CHARACTERISTICS**

<b>Appearance</b>	Clear liquid
<b>Colour</b>	Light blue
<b>Fragrance</b>	Weak characteristic
<b>Specific weight</b>	0.985 ± 0.015 g/ml
<b>Solubility in water</b>	Complete when diluted as indicated.
<b>pH</b>	2.5 - 3
<b>Chemical properties</b>	Nonionic

**FOAMING POWER**

Low

**AVAILABLE PACKAGING**

Box of 4 containers - 5Kg each - 016BLMATN20  
 20 Kg container - 016BLMA0020

**USE MODALITY**

BRILLMATIC must be mixed with the water for the final rinse cycle, with an average dosage of 0.30 ml/L.

In cup washers fitted with a small dosage group for rinse-aid, it is sufficient to have the drawing tube draw directly from the product container; otherwise, it is necessary to fill the appropriate tank, following the usage instructions for the dishwasher.

In industrial-type dishwashers, for the best results, it is necessary to install the dedicated automatic dosage units which guarantee the correct dosing.
